

Nature Trail

Target group: Everybody

Type: Exploratory/Awareness-raising

Duration: 2 or 7 days

Country: Serbia

- **METHOD:** *Course modules include: Assessment and analysis of different Ecological Footprints; Preparation of modules for calculating specific ecological footprint as an introductory approach in Serbia; and Syllabus development for a training course. Project implementation begins with the preparation of different modules for the calculation and evaluation of specific ecological footprints at different levels (country, city, school, individuals) by researching existing and available models of calculating. The syllabus for a training course was developed in Serbia and successfully implemented as the pilot course under the Eco-Schools programme.*

- **MATERIAL:** *Environmental education materials, camera.*
- **POTENTIAL PARTNERS:** *Socially responsible companies, schools, local nature protectors, researchers, scientists, decision makers, civil society organisations.*
- **COMMUNICATION:** *Invitation email to schools, local media, and environmental education centres.*
- **TIPS:** *As part of the course, students can present the results of their footprint calculations to local community, and suggest different ways how to reduce it.*
- *Remember to take a picture and post it on the Blue Flag Facebook page!*
