At the meeting of the Council of the Association "Environmental Ambassadors for Sustainable Development" held on 3rd of April 2016, the following revised text was adopted

STATUTE OF THE ASSOCIATION

"Environmental Ambassadors for Sustainable Development"

GENERAL PROVISIONS

Article 1

"Environmental Ambassadors for Sustainable Development" (hereinafter: Association) is a voluntary non-government and non-for-profit association having the expert, scientific, innovative, professional and social character, established for an unlimited period, with the intention of acting in the general interest of advancing, popularisation and promotion of scientific research work, as well as in the public interest in the areas of sustainable development, environmental protection and education, and in other areas of implementation of the objectives of the Association, through the research, consultancy, expert analysis, innovation, education and promotion.

OBJECTIVES

Article 2

The main objectives of the Association are:

- Gathering and organising of scientists and professional experts in the field of sustainable development and environment (environmental engineers, graduate biologists – ecologists, environmental analysts and analysts from other complementary and related professions) in order to achieve their interests, increase their professional knowledge, achieve an appropriate status both professional and in community, on the basis of their professional contribution in their respective fields;
- Development of mutual cooperation and cooperation with relevant international organisations of the same and similar professions;
- Improvement of the calling interests, reputation and protection of the members of the association as well as providing assistance to its members;
- Development of all forms of successful cooperation with other professional organisations and associations in the interest of its members;
- Providing assistance to the experts from these professions in the scientific and the professional development and organisation of the appropriate forms of continual education, namely education throughout life;
- Advancement of scientific research work, promotion and popularisation of science and technology and ensuring the preservation of scientific and technological heritage, development of innovative and development projects, as well as programs of general interest;
- Monitoring the contemporary development of engineering, technology and ecology and indication of the trends of events and changes as well as giving opinions on technical and technological solutions in the fields of sustainable development and environment;
