Why this newsletter for the ENV.net project?

Adoption of the EU Environmental Acquis is one of the biggest challenges behind the legislative changes in the candidate and potential candidate countries in the Western Balkans and Turkey. Most of the time, when it comes to the EU mechanisms, local NGOs and citizens are lost.

What are the mechanisms for participation in the decision making, what kind of support is available at the EU level for Western Balkans and Turkey, what are the current discussions within EU countries, what are the requirements for countries who want to join the EU and the roadmap for membership?

A newsletter will not provide answers to all these questions but hopefully will help to develop the right contacts and provide a platform to share experiences.

So, we would appreciate if you can join us in our ongoing efforts to give voice to citizens of the Balkans and Turkey in this process!

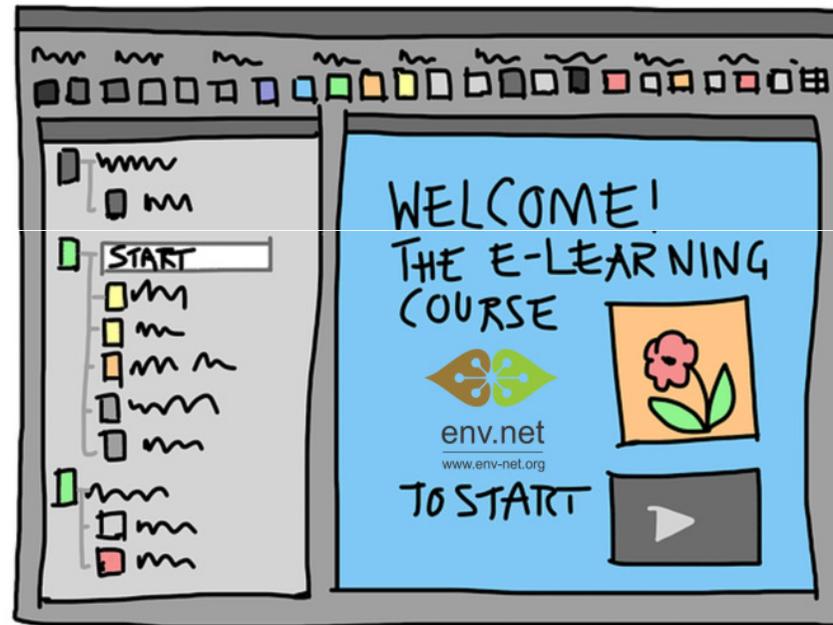

Season's Greetings,
The ENV.net project team

Recent events

Warsaw The nineteenth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change (COP-19) and November.

This meeting can hardly be called a success and, therefore, it was not surprising that more than 800 civil society representatives walked out of the COP-19 expressing disgust at governments' lack of commitment in mitigation, refusal to commit significant amounts of climate finance, and the Polish government's insistence that the COP serve the interests of the fossil fuel industry over the necessities of climate solutions. Climate 2013
