## I. Background of the ENV.net project

The ENV.net project builds on the experience of the Environment Forum (<http://www.envforum.eu/doku.php>), implemented in the period 2009-2012, aiming at developing capacities of environmental NGOs to establish a constructive dialogue with national authorities. The present project strategy has been designed to achieve a greater commitment and capacity of a group of CSOs coming from Environment Forum experience and which have agreed on the creation of a new network, the ENV.net, to support the civil activism, give citizens a voice and influence the public reform processes in the approximation to the environment *acquis*.

ENV.Net has entered its third phase, and it currently covers the entire Western Balkan including representative organisations from all seven WB countries, and two partner organisations from EU based member countries.

The project strategy is expected to consolidate the partner CSOs role in fostering the state-civil society dialogue at national and regional levels, in analysing and monitoring the on-going process reforms and finally at providing actual opportunities to give citizens and CSOs a voice in the environmental reform process and in the integration with EU.

### I. ENV.Net Project Objective

On **an overall objective level**, the project proposal aims to contribute to the **improvement of environmental policy-making and implementation** in compliance with the EU standards. To this end, the network foresees to contribute to both **improved and intensified inter-action among actors** (including environmental CSOs, media and policy-makers) and an **overall more enabling technical and financial environment** where these actors operate.

**On a specific objective level**, the action sets out to **strengthen the profile of ENV.net** as the leading network and bridging actor **in environmental policy-influencing** in the WB and Turkey region (vis-à-vis EU). Further, it foresees introducing and **initiating a discussion on the Circular Economy** concept in the region, as well as **intensifying climate change actions**. The action also foresees a number of value-adding, cross-cutting elements such as **inter-partner learning/exchange, networking, and thematic organisational support to third parties** (*i.e. local grass-root organisations, media*).

## II. ENV.net Expected Project Results

**Result 1** – ENV.net becomes a leading pan-regional network in the WB and Turkey in orienting and influencing environmental and circular economy policy discussions at an EU level.

**Result 2** – CSOs and mainstream/online media are supported by the ENV.net in the process of improving their skills and work related to environmental issues.
